Wingmasters is a partnership of Julie Anne Collier and Jim Parks, licensed raptor rehabilitators based in Massachusetts, who are dedicated to increasing public understanding and appreciation of North American birds of prey. Together they care for injured birds of prey.

The Wingmasters program features Five LIVE Birds of Prey from the hawk, falcon and owl categories. The program is designed to explain predation, the birds' place at the top of the food web, their different hunting adaptations and their status in a rapidly changing world. Because many birds of prey are declining in number, this presentation also features one or more of the endangered raptors that they care for, and explains why these species face an uncertain future.
