

Smoke Detector Recommendations

Smoke detectors have a 10-year life expectancy.

If your house was built before 1999 and you have the original smoke detectors, they need to be replaced.

The Brookline Fire Department recommends battery operated smoke detectors that talk to each other.

One should be placed on each level of the house and one in each sleeping area.

If you have any questions, please call Asst. Chief Scott Knowles - 672-8531.
